SUPPLEMENTARY INFORMATION:

Title: U.S. Origin Health Certificate.

OMB Control Number: 0579-0020.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture, among other things, has the authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict the import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease. Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing APHIS' ability to compete in the world market of animal and animal product trade.

The export of agricultural commodities, including animals and animal products, is a major business in the United States and contributes to a favorable balance of trade. As part of its mission to facilitate the export of U.S. animals and products, APHIS' Veterinary Services maintains information regarding the import health requirements of other countries for animals and animal products exported from the United States.

Among other things, to ensure a favorable balance of trade, APHIS uses information collection activities, such as U.S. Origin Health Certificates; U.S. Origin Health Certificates for the Export of Horses from the United States to Canada; Health Certificates for the Export of Live Finfish, Mollusks, and Crustaceans (and their Gametes); Country-specific Health Certificates; United States Interstate and International Certificate of Health Examination for Small Animals (Exporters); Inspection and Certification for Animal Products; Undue Hardship Explanations-Animals; Applications for Approval of Inspection Facility-Environmental Certification; Annual Inspections of Export Inspection Facilities; Opportunities to Present Views Concerning Withdrawal of Facility Approval; Certifications to Carry Livestock; Inspections of Vessel Prior to Voyage; Notarized Statements; Aircraft Cleaning and Disinfection; and Travel Time.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1.098 hours per response.

Respondents: Owners and facility operators, accredited veterinarians, exporters, and owners or masters of vessel.

Estimated annual number of respondents: 4,072.

Estimated annual number of responses per respondent: 95.

Estimated annual number of responses: 386,191.

Estimated total annual burden on respondents: 424,316 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 8th day of June 2020 .

Michael Watson,

Acting Administrator, Animal and Plant Health Inspection Service.
